

LIST OF CONTENTS

| | |
|---|-------|
| <u>CHAPTER-1</u> | 01-05 |
| INTRODUCTION | |
| 1.1 Introduction | 02 |
| 1.2 Principle of Lift and Drag | 02 |
| 1.3 Boundary Layer | 03 |
| 1.4 Objective with Specific Aims and Possible Outcome | 04 |
| 1.5 History and Background | 05 |
| | |
| <u>CHAPTER-2</u> | 06-15 |
| LITERATURE REVIEW | |
| 2.1 Aerodynamic Forces Experienced by an Aircraft | 07 |
| 2.2 Lift and Drag of a Circular Cylinder | 08 |
| 2.3 Lift and Drag of Sphere | 10 |
| 2.4 Flows Past of a Two-dimensional Aerofoil | 11 |
| 2.4.1 Aerofoil Terminology | 13 |
| | |
| <u>CHAPTER-3</u> | 16-24 |
| EXPERIMENTAL SETUP | |
| 3.1 Wind Tunnel AF 100 | 17 |
| 3.1.1 Major Parts: | 17 |
| 3.1.1.1. Effuser | 17 |
| 3.1.1.2. Working Section | 18 |

| | | |
|----------|--------------------------------------|----|
| 3.1.1.3. | Three Component Balance(AF A3) | 19 |
| | 3.1.1.4. Balance angle Feedback Unit | 19 |
| | 3.1.1.5. Diffuser and Fan | 20 |
| 3.1.2 | Technical Data | 20 |
| 3.1.3 | Versatile Data Acquisition System | 21 |
| 3.2 | Fabrication of Profiles | 21 |

CHAPTER-4 25-40

EXPERIMENTAL RESULTS

| | | |
|-----|---|----|
| 4.1 | Collection of Experimental Data | 26 |
| 4.2 | Aerodynamic Characteristics of NACA 0015 | 26 |
| 4.3 | Aerodynamic Characteristics of NACA 4415 | 32 |
| 4.4 | Aerodynamic Characteristics of the Cylinder | 39 |
| 4.5 | Aerodynamic Characteristics of the Sphere | 40 |

CHAPTER-5 41-46

DISCUSSIONS

| | | |
|-----|---|----|
| 5.1 | Comparison of Coefficient of Drag Force of Theoretical Result | 42 |
|-----|---|----|

CHAPTER-6 47-49

CONCLUSIONS AND RECOMMENDATIONS

| | | |
|-----|-----------------|----|
| 6.1 | Conclusion | 48 |
| 6.2 | Recommendations | 49 |

LIST OF FIGURES

| FIGURE NO NO | FIGURE NAME | PAGE |
|-------------------------|--|-------------|
| 1.2 | Laminar and Turbulent Flow of Boundary Layers..... | 04 |
| 2.1 | Aerodynamic Forces on a Typical Aerofoil..... | 07 |
| 2.2 | Circular Cylinder without Circulation..... | 08 |
| 2.3 | A Circular cylinder with Circulation..... | 09 |
| 2.5 | A Circular sphere..... | 10 |
| 2.7 | Two-dimensional Aerofoil..... | 12 |
| 2.8 | Air flow separation from aerofoil section..... | 12 |
| 2.9 | Aerofoil Terminology..... | 13 |
| 3.1 | Wind Tunnel AF 100..... | 17 |
| 3.2 | Effuse or Contraction Cone..... | 18 |
| 3.3 | Working Section of Wind Tunnel AF 100..... | 18 |
| 3.4 | Three Component Balance..... | 19 |
| 3.5 | Balance Angle Feedback Unit..... | 19 |
| 3.6 | Diffuser and Fan..... | 20 |
| 3.7 | Versatile Data Acquisition System (VDAS)..... | 21 |
| 3.8(a) | Cylindrical profile..... | 21 |
| 3.9(b) | Sphere shaped profile..... | 22 |
| 3.8(c) | Symmetrical aerofoil (NACA 0015)..... | 22 |
| 3.8(d) | Cambered aerofoil (NACA 4415)..... | 22 |
| 3.9 | Hollow cylindrical steel rod attached with the profil..... | 23 |
| 3.10 | Drilling of the profiles..... | 24 |

LIST OF GRAPHS

| FIGURE NO NO | GRAPH NAME | PAGE |
|-----------------|---|------|
| 1.1 | Variation of Lift and Drag Forces with Angle of Attack for a Typical Aircraft of Symmetric Aerofoil..... | 03 |
| 2.4 | Drag Coefficient vs. R_e number for a circular cylinder (Scruton and Rogers, 1971)..... | 09 |
| 2.6 | Effect of Reynolds number on the drag coefficient of a smooth sphere..... | 11 |
| 2.10 | The Drag coefficient vs. Angle of Attack graph of NACA 0015 symmetrical aerofoil..... | 15 |
| 2.11 | The Drag coefficient vs. Angle of Attack graph of NACA 4415 cambered aerofoil..... | 15 |
| 4.1 | Drag Coefficient vs. Reynolds Number at -3° angle of attack for NACA 0015..... | 26 |
| 4.2 | Drag Coefficient vs. Reynolds Number at 0° angle of attack for NACA 0015..... | 27 |
| 4.3 | Drag Coefficient vs. Reynolds Number at 3° angle of attack for NACA 0015..... | 27 |
| 4.4 | Drag Coefficient vs. Reynolds Number at 6° angle of attack for NACA 0015..... | 28 |

| FIGURE NO | GRAPH NAME NO | PAGE |
|------------------|--|-------------|
| 4.5 | Drag Coefficient vs. Reynolds Number at 9° angle of attack for NACA 0015..... | 28 |
| 4.6 | Drag Coefficient vs. Reynolds Number at 12° angle of attack for NACA 0015..... | 29 |
| 4.7 | Drag Coefficient vs. Reynolds Number at 15° angle of attack for NACA 0015..... | 29 |
| 4.8 | Drag Coefficient vs. Reynolds Number at 18° angle of attack for NACA 0015..... | 30 |
| 4.9 | Drag Coefficient vs. Reynolds Number at different angle of attack for NACA 0015..... | 30 |
| 4.10 | Variation of Lift coefficient vs. angle of attack at different R_e for NACA 0015..... | 31 |
| 4.11 | Variation of drag coefficient vs. angle of attack at different R_e for NACA 0015..... | 32 |
| 4.12 | Drag Coefficient vs. Reynolds Number at -3° angle of attack for NACA 4415..... | 33 |
| 4.13 | Drag Coefficient vs. Reynolds Number at 0° angle of attack for NACA 4415..... | 33 |
| 4.14 | Drag Coefficient vs. Reynolds Number at 3° angle of attack for NACA 4415..... | 34 |

| FIGURE NO NO | GRAPH NAME | PAGE |
|-------------------------|---|-------------|
| 4.15 | Drag Coefficient vs. Reynolds Number at 6° angle of attack for NACA 4415..... | 34 |
| 4.16 | Drag Coefficient vs. Reynolds Number at 9° angle of attack for NACA 4415..... | 35 |
| 4.17 | Drag Coefficient vs. Reynolds Number at 12° angle of attack for NACA 4415..... | 35 |
| 4.18 | Drag Coefficient vs. Reynolds Number at 15° angle of attack for NACA 4415..... | 36 |
| 4.19 | Drag Coefficient vs. Reynolds Number at 18° angle of attack for NACA 4415..... | 36 |
| 4.20 | Drag Coefficient vs. Reynolds Number at different angle of attack for NACA 4415..... | 37 |
| 4.21 | Variation of Lift coefficient vs. angle of attack at different R_e for NACA 4415..... | 38 |
| 4.22 | Variation of drag coefficient vs. angle of attack at different R_e for NACA 4415..... | 38 |
| 4.23 | Drag Coefficient vs. Reynolds Number at different angular position for the Cylinder..... | 39 |
| 4.24 | Drag Coefficient vs. Reynolds Number at different angular position for the Sphere..... | 40 |
| 5.1 | Drag Coefficient vs. Reynolds Number at different angle of attack for NACA 0015..... | 42 |
| 5.2 | Drag Coefficient vs. Reynolds Number at different angle of attack for NACA 4415..... | 43 |

| FIGURE NO | GRAPH NAME NO | PAGE |
|------------------|---|-------------|
| 5.3 | Drag Coefficient vs. Reynolds Number at different angular position for the Cylinder..... | 44 |
| 5.4 | Drag Coefficient vs. Reynolds Number at different angular position for the Sphere..... | 45 |
